

Our Model

Spelligent is an inclusive-by-design school designed to meet the needs of students across the spectrum of ability by providing a rigorous, accessible, and engaging learning experience.

There are four key elements of our model:

Learner Profile

We design an individual profile for each learner based on key learning traits. Those traits include:

- Student cognition (attention, memory, executive functioning, and processing)
- Social and emotional skills
- Academic skills

Educator Efficacy

All staff have the knowledge, skills, and mindsets necessary to support learner variability in the classroom

- Every educator **understands how to support learner variability** and **social-emotional needs**
- **Rethink educator roles and responsibilities** to maximize educator capacity and reduce burnout
 - ✓ Spread expertise across role types
 - ✓ Empowering paraprofessionals with relevant professional learning
 - ✓ Align teacher roles with a specific expertise
 - ✓ Develop equitable expectations and working conditions for special educators

Inclusive Instruction

We implement a rigorous academic curriculum and make that content engaging and accessible, so it is designed to meet the needs of the range of learners in a classroom.

- **Targeted instructional sequence** based upon learner profile
- **International baccalaureate** academic model
- **Universally designed lessons** so they are **accessible** to all

Connection-Centered Culture

Create a school culture that prioritizes student and adult belonging and well-being

- Every student has an **adult mentor** to provide **individualized support**
- Students are members of a **peer support team**
- **Train families** on student learner profile
- Integrated **staff health and wellness supports**
